While the risks are most often very minimal, in rare cases, complications such as sprain/strain injuries, irritation of a disc condition, and although rare, minor fractures, and possible stroke, which occurs at a rate between one instance per one million to one per two million, have been associated with chiropractic adjustments.

Treatment objectives as well as the risks associated with chiropractic adjustments and, all other procedures provided at Clermont Chiropractic Life Center have been explained to me to my satisfaction and I have conveyed my understanding of both to the doctor. After careful consideration, I do hereby consent to treatment by any means, method, and or techniques, the doctor deems necessary to treat my condition at any time throughout the entire clinical course of my care.
